

Metals, especially aluminium, are among the most recycled materials on the planet. Some of our Chemetal metals contain up to 85% recycled content. Plus, Chemetal is not petroleum-based, unlike many plastics, resins and other commercial interior products.

Chemetal contributes to LEED in several areas:

### **LEED V4 Credit Contribution:**

LEED MR Credit

Building Product Disclosure & Optimisation –  
Materials Ingredients

### **LEED 2009 Credit Contribution:**

LEED MR Credit 4

Recycled Material

LEED MR Credit 5

Regional Materials

LEED EQ Credit 4.1

Low Emitting Materials – Adhesives & Sealants
