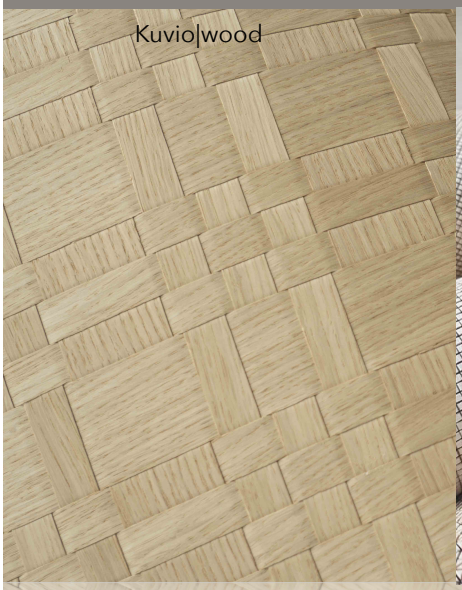
REAL WOOD VENEERS



Our ***real wood veneer range*** is a sought-after, premium decorative finish that adds prestige and style to furniture, joinery and *EVEN* upholstery materials like shoes and handbags! Choose from a vast array of species, colours and timber grains. The final finish is virtually identical to solid timber!

i:zi|wood
With extreme flexibility, this range is easy to use with outstanding properties in regards to flexibility and ease of application. Material can be cut with scissors or a craft knife and bonded to any dry substrate. This is also available with a pre-finished surface and/or a self-adhesive film on the back for ease of installation.

Nuo:|wood

A textile, as smooth as fabric and as soft as leather. This range is surprisingly light, flexible and can be bent in all directions. Made of high-quality veneer that comes exclusively from sustainable forestry.

Kuvio|wood

Highly durable and flexible, this range is made of 3D woven patterns. Pre-sanded strips of veneer are woven and backed with a special fleece material to make it highly versatile and easy to work with. These are ideal for forming/shaping challenging surfaces and are processed just like normal spliced veneers.

Natural and environmentally-friendly.

Can be moulded to fit many shapes, giving the versatility of solid timber - our oldest, yet most modern material.

Warm and gentle to touch, veneers add a natural warmth and ambience to any project!
