

300 Series Disclaimer

When ordering materials in our 300 Series, we strongly suggest ordering all sheets needed for your project at one time so we can best match materials. This is because materials in the 300 Series are oxidised by hand and machine. It's an artistic process done with a manufacturing consistency.

However, subtle differences like hue variation and metal "lot" differences occur with these metals, especially when produced at different times. These differences are slight and usually only noticeable when material is placed side by side.

We do our best to match materials per order but aren't always made aware when an order is an addition to an existing job. In that situation, it is best to send us a material retain we can match.

Please view the hi res and full sheet image downloads on our website so you are aware of the pattern and range of colour tones for this design. Please [contact us](#) with questions. Thank you.
