Work with Metalier

Join Metalier - Embrace this limited opportunity!

We make things that aren't made of metal look as though they are, and make some metals look like different metals.

When you join us you will create with metal in a new and exciting way.

Work with us

Metalier is looking for a small number of special qualified companies and people to join our application team.

The chosen applicators will be trained to create real metal finishes for designers, architects and customers.

What is Metalier?

Metalier is a real metal coating. It's like paint but it's so much more than a paint. It's genuine metal powders in a proprietary water-based liquid. When finished it's up to 95% metal.

What is the business case for Metalier?

Architects and designers are constantly looking for new materials and they care more than ever about the environment. Metalier ticks all the boxes for sustainability and durability.

Metalier allows designers to use metal more frequently in their designs, as it doesn't have the constraints of sheet metal. Metalier is light, seamless over large areas and goes round corners and curves.

Metalier is a global company. Its business model is to maintain the exclusivity and the prestige of the product and brand by limiting the number of applicators. This means that you will not face competition in your area and will be fully supported by Metalier.

How do I become an applicator?

Apply to:

Metalier, Auckland, New Zealand

T: +61 2 4872 2441

E: letschat@thatmetalcompany.com.au

We will be able to tell you if there is an opportunity in your area. We will also explain the process to become an applicator.

Check out our FAQ's for more information

How is Metalier applied?

Metalier is applied exclusively by trained applicators. The process requires a spray or rolled application with sanding and clear coating or waxing to finish.

What skills are required?

The two main skills required are spray painting and sanding/finishing. The successful applicators will receive full training.

How long does it take to apply?

This will depend on the finish. Some are very quick and others will take up to an hour to complete 1 sq m of applied finished. The process is all crafted by hand and is a bespoke high-end finish.

What are the set-up costs and equipment required?

You will need a spray booth or spray area and compressed air. We use HVLP guns and rollers and hand-sanding tools.

We will discuss the costs for training and the initial purchase of materials to create samples and practice your application.

NICKEL SILVER SMOOTH

Where can Metalier be used?

You can use Metalier inside and out.

Use Metalier everywhere you wish to use metal.

- front entrance doors
- kitchen cupboard doors
- splash backs
- range hoods
- islands
- cabinets
- credenzas
- hall tables
- tv screen covers
- fireplace surrounds
- reception desks
- wall and ceiling panels

And there are bound to be places we haven't thought of yet.
