What you need  
to know about  
choosing Metalier

# What is Metalier?

A real metal coating

It's like paint but it's so much more than a paint.

It's genuine metal powders in a proprietary liquid.

When finished it's 95% metal.

## Where can I use Metalier?

Use Metalier everywhere you wish to use metal.

- front entrance doors
- kitchen cupboard doors
- splash backs
- range hoods
- islands
- cabinets
- credenzas
- hall tables
- tv screen covers
- fireplace surrounds
- reception desks
- wall and ceiling panels

And there are bound to be places we haven't thought of yet.

# Environmentally Responsible

Metalier Water-based Metal Coat is an environmentally responsible choice as it contains no volatile organic compounds (VOCs), benefiting both the environment and those using the system.

This not only reduces air pollution but also ensures compliance with environmental regulations.

## Health- Conscious

Metalier Water-based Metal Coat is safer for workers' health due to their reduced presence of toxic fumes and chemicals.

This contributes to improved indoor air quality and a safer workplace.

# Regulatory Compliance

Many regions have stringent regulations governing VOC emissions and the use of hazardous materials.

Employing water-based spray metal systems ensures businesses adhere to these regulations, avoiding potential fines or penalties.

## Why should I choose Metalier?

For bespoke exciting finishes that will put wow into your design.

It will be unique to you.

It's sustainable and durable.

\* These finishes are only available in the metal shown.

Additional finishes and samples of them can be obtained from your chosen applicator.

# Can I get samples?

Contact us at [letschat@thatmetalcompany.com.au](mailto:letschat@thatmetalcompany.com.au) for samples of our Metalier Signature Finishes Collection.

Our Metalier Signature Finishes Collection illustrates some of the options and the versatility of finishes that can be achieved with Metalier.

For more custom or bespoke finishes email us your ideas and we can have one of our trained applicators work with you to create the look you want to achieve.

A design fee will be payable for custom samples which will be rebated when the job proceeds.

## What does it cost?

Metalier is priced per square metre and on a job by job basis. Prices will vary depending upon the finish and the metal chosen.

Contact us with your details, dimensions and design specifications and we can provide estimate pricing and/or put you in touch with one of our trained applicators to work directly with you.

# How do I care for my Metalier finish?

Metalier is very easy to care for. It can be wiped clean with a damp micro-fibre cloth. A mixture of ordinary household detergent heavily diluted will help with stubborn dirt.

## What is the process of applying Metalier?

The Metalier system is a mixture of metal powders and a proprietary liquid that is applied to a surface.

The film layer that forms during curing is sanded away to expose the metal. Then the finishing magic takes place. Finally, a clear coat is applied that protects the metal, delays oxidization and provides a surface that's easy to clean.

The whole process is hand-crafted. Each piece is unique.

# How long does the process take?

The process involves several steps: applying a base coat, a metal coat, and a clear coat, with sanding before each coat.

It is recommended to let both the base coat and the metal coat dry thoroughly overnight before proceeding with sanding. Similarly, the clear coat should also be allowed to cure overnight before the item is packaged.

Items coated on one side will take at least three days and double-sided items can take six days. The system is not a paint and takes considerably longer than a paint job.

While the lead time for each project can vary, we typically suggest planning for a timeframe of about 20-25 business days, with larger projects potentially requiring more time.

When you place your order, we will be able to give you a lead time.

If you have more questions please don't hesitate to ask.
